

## Health and Safety Policy

UK Exchangers Ltd specialise in the selection and manufacture of a wide range of heat exchangers for industrial, food, dairy, agricultural, hygienic, refrigeration, HVAC and marine applications.

As a UK Manufacturer, we are able to supply our products and spare parts either from stock or express built to order using stock components

### Our Health and Safety commitments

It is our objective to:

1. Provide safe and healthy working conditions to eliminate hazards and reduce risks, with the aim to prevent injury and ill health, for those working on our behalf and in the immediate vicinity.
2. Maintain and continually improve a Health & Safety Management System aligned with ISO 45001 and other ISO standards, and to meet all legal and other requirements.
3. Establish measurable health and safety objectives to help us evaluate and continually improve our health and safety performance.
4. Ensure communication is provided to all those working for UK Exchangers Ltd, consultation and involvement in the Health and Safety Management System, policies, risk assessments and safe systems of work

This policy statement is issued by the Managing Director and will be reviewed annually to ensure that it remains up to date and reflects our strategic direction.

Peter Hartley

Managing Director
